

Overview

Country or Region: United States

Industry: Staffing

Customer Profile

Ramona, California-based Driven Staffing is focused on temporary, temporary to hire and permanent placement of Scientific, Clinical Research and Engineering professionals. The company is a soon to be certified, women owned staffing firm.

Business Situation

Driven Staffing was on Google Apps for email when it realized that it needed a more comprehensive, strategic IT direction—a long-term plan that included integrated tools to support business growth.

Solution

The company switched to Microsoft Office 365 to give its employees fully integrated messaging, unified communications, and document storage tools that make them more effective from anywhere on any device.

Benefits

- Enhanced employee productivity
- Improved responsiveness
- Greater cross-company collaboration

Microsoft Office 365

The new Office provides anywhere access to your familiar Office applications—plus email, calendar, video conferencing, and your most current documents—on almost any device, from PCs to smartphones to tablets.

Staffing Firm Excels While Transforming Environment with Microsoft Office 365

“By switching to Office 365, we’ve removed the headaches related to our old Google Apps for Work solution. With a comprehensive productivity platform, we are able to work with each other from anywhere and be a more dynamic as a company.”

—Meredith Dow, Principal Founder, Driven Staffing

Driven Staffing was founded, and is staffed by, former Scientists who have hands-on experience in the industries we service. The company wanted to support its growth goals and make it easier for employees to stay connected while representing the company and the social responsibility it stands for, no matter where and how they worked.

After a deployment of Google Apps, Driven Staffing switched to Microsoft Office 365 because it offered a better-integrated set of tools and was easier to use. Employees now can communicate seamlessly both internally and with clients, employers, and job seekers. Now that the company uses Office 365, it has a reliable messaging infrastructure, comprehensive calendaring capabilities, conferencing, document storage, and other unified capabilities that are helping it transition into a more connected, nimble business.

Technical Summary

Driven Staffing uses a range of Microsoft Office 365 components to help unify the company. Employees take advantage of Exchange Online for comprehensive messaging and calendaring, and they use OneDrive for Business as a centralized source for online document storage. They tap into the greater Driven Staffing knowledge base through Lync Online for presence, instant messaging, and conferencing capabilities.
